

# SINGH SHUBHAM KUMAR

Full-Stack Developer | Python, Java, React

📍 Ahmedabad, Gujarat • 📞 +91 70414 84034 • ✉️ singhshubhamk287@gmail.com • 🔗 LinkedIn • 📁 GitHub

## PROFESSIONAL SUMMARY

Results-driven **Full-Stack Developer** specializing in **Python (FastAPI)**, **React.js**, **Next.js**, and **PostgreSQL** with hands-on experience engineering scalable microservices, automated anti-bot web scraping pipelines, and AI execution workflows. Proficient in monorepo management with **Turborepo**, enterprise Role-Based Access Control (**RBAC IAM**) via Microsoft Entra ID, and containerized cloud deployments on **AWS (ECS, S3, Secrets Manager)**.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript (ES6+), TypeScript, Java (J2SE, J2EE), SQL

**Frameworks & Libraries:** FastAPI, Django(DRF), React.js, Next.js, Spring Boot, RESTful APIs, Tailwind CSS

**Databases & Caching:** PostgreSQL, MongoDB, MySQL, Redis, SQLAlchemy

**Cloud & DevOps:** AWS (ECS, S3, Secrets Manager), Docker, Turborepo, uv, Git, GitHub, CI/CD, Render, Vercel

**Core Competencies:** Microservices, Monorepo Architecture, AI Execution Pipelines, Anti-Bot Scraping, RBAC, System Design, DSA

## WORK EXPERIENCE

**Lanet Team** — Surat, Gujarat

Jan 2026 – Present

**Full-Stack & AI Integration Developer Intern**

**Project:** AI-Based Document Reviewer System

- Architected and deployed an end-to-end enterprise AI document review system inside a **Turborepo monorepo**, integrating **Next.js** frontend interfaces with **FastAPI** microservices.
- Engineered a modular **7-step AI execution pipeline** (Document Splitting → Chunking → First Analyzer → Deep Reviewer → Critical Issue Checker → Summarizer → Report Generation), cutting manual document review time by **75%**.
- Implemented **uv** for high-performance Python virtual environment and dependency management, accelerating build cycles and package resolution by over **3x**.
- Designed normalized **PostgreSQL schemas** with compound indexing for audit logging, relational metadata, and pipeline execution tracking.
- Managed cloud container infrastructure using **AWS ECS**, stored secure file assets in **AWS S3**, handled credentials via **AWS Secrets Manager**, and enforced enterprise-grade **RBAC IAM** via Microsoft Entra ID.

## PROJECTS

**Student Attendance Management System**

Feb 2025 – April 2025

**Tech Stack:** FastAPI, MongoDB, React.js, JWT Authentication, RBAC, Docker, Render, Vercel

- Architected an automated role-based attendance management system for professors, HODs, and students featuring secure **JWT authentication** and granular **RBAC**.
- Built asynchronous RESTful APIs using **FastAPI** and **MongoDB (NoSQL)** with compound index optimization, achieving **sub-50ms response latency** under concurrent load.
- Developed an interactive **React.js dashboard** supporting real-time attendance tracking, automated CSV/PDF report generation, and analytics visualizations.
- Containerized microservices with **Docker** and established automated CI/CD pipelines via **Render** (backend) and **Vercel** (frontend).

**E-Commerce Scraping & Real-Time Analytics Platform**

Nov 2025 – Jan 2026

**Tech Stack:** Python, FastAPI, React.js, PostgreSQL, Redis, Proxy Rotation, Docker

- Engineered automated scraping engines with anti-bot evasion: residential proxy pool rotation, user-agent randomization, CAPTCHA bypass routines, and stealth headless browser automation.
- Designed a high-throughput data pipeline storing **100,000+ scraped price records** in **PostgreSQL**, leveraging a **Redis caching layer** to lower database query load by **60%**.
- Built a responsive **React.js analytics dashboard** with dynamic price tracking charts, competitor price drop alerts, and low-latency **FastAPI** querying endpoints.

## EDUCATION

**Government Engineering College (GEC)** — Patan, Gujarat

May 2022 – May 2026

**Bachelor of Engineering in Computer Science and Engineering**

Cumulative GPA: 8.64 / 10.0 (Semester 5 SPI: 9.04 / 10.0)

## CERTIFICATIONS & ACHIEVEMENTS

- Smart India Hackathon (SIH) 2024:** SSIP Participation Certificate (Team CodeSweepers) – Built scalable AI/web solutions for national hackathon.
- Prompt Engineering for Developers:** Comprehensive coursework in LLM orchestration, structured JSON parsing, and context optimization.
